HR CONSULTING,
ORGANISING IT RELATED TRAINING,
MARKETING OF IT SOLUTIONS AND PROJECTS**

for meeting the growing demands of skilled IT professionals.

Core Services

OUTSOURCING

IT People Gulf's business model revolves around the key needs of customer i.e. "Strategic Outsourcing"

Our success has been dependent on answering this requirement helping customer get the latest in IT solutions with its Offshore Outsourcing Model which is complemented with our presence in GCC.

PROJECT STAFFING

We provide staff (team) to manage projects from beginning of project till its completion from our pool of resources.

We have resources experienced on different platforms and have exposure of various commercial applications on different operating systems and databases.

CONTRACT STAFFING

We offer IT Contract consulting services that keep pace with your ever-changing needs. This provides you the needed flexibility in terms of expertise, experience and duration required - all without the administrative hassles most employers face.

To ensure uninterrupted performance, a steady flow of professionals and ramping up in case of exigencies also form a part and parcel of our contract consulting services.

PERMANENT STAFFING

Years of experience and knowledge combined with a reputation that we are proud of, we time and again deliver the excellence that would exceed your expectations.

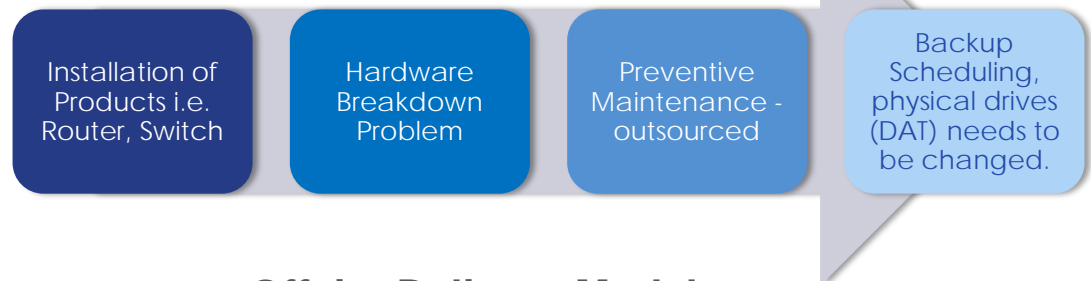

The IT People recruiting team maintains a very influential pre-screened database. Using our highly sophisticated scrutiny processes, our staff can respond promptly and perfectly to a company's permanent staffing needs.

IT Asset Management

We have a team of expert engineers who have been managing all ranges of IT Assets like Servers, Printers, Network equipment's and other devices. We can provide remote services for most of your problems and Engineers will visit on site in case of emergencies.

- ❖ ERP Operations Support
- ❖ Remote Hardware Monitoring
- ❖ Remote Network Monitoring
- ❖ Patch Updating
- ❖ Preventive Maintenance - Health checkup

Near Shore Development

Outsourcing the operations of the company to an adjacent or nearby place having similar culture and language skills. Near shore outsourcing offers some cost savings over onshore and has the added benefit of proximity for more frequent site visits, while retaining a highly skilled labor pool.

Near Shore Outsourcing features near shore development centers. These development centers are dedicated pools of specialized engineering and programming resources that act as virtual extensions to your own software development teams.
